## MR X UV LED

### High Resolution Inkjet Printers

*"Unique instant curing system: UV LED Curing On Board Security System®"*

UBS **MRX UV LED** High Resolution Inkjet Printer, with integrated **UV LED Curing On Board Security System®**, is developed to print directly on non-porous surfaces such as coated cases, trays, films, etc.

APLINK **MRX UV LED** incorporates an exclusive design integrated LED lamp allowing UV LED-based ink dry instantly by polymerization.

Designed and manufactured to print texts, images, logos, symbols and any 100% legible 1D/2D barcodes compatible with GS1 standards (GTIN13, GTIN14, G21-128, GS1 Datamatrix...) for secondary packages of non-porous surfaces, such as non-porous cases, cardboard trays with stretch film and plastic bags, etc.

4th generation piezo electric print head allows printing messages up to 72 mm height, of high contrast, using UV LED-based ink, at resolutions up to 180 x 720 dpi and speed up to 60 m/min.

Thanks to its modular design, **APLINK MRX UV LED** allows simultaneous use of 1 to 4 printheads connected to one controller with

10.1" full color touch screen and intuitive graphic interface, that allows operate each printhead independently. Message editor incorporated into touch screen controller.

Low Migration and low viscosity UV LED curable ink. The non-pressurized ink bottle contains UV LED-based ink. It can be replaced in non-stop mode.

The innovative temperature and drop volume control technology and UV LED instant curing system, ensures a low consumption and a reliable print out and it becomes a great tool for cost-saving on the production line.

**MRX UV LED** can be connected to any information or automation system through the **UBS Labman 4.0** software, which allows the management and connection of all data with any ERP, MES, WMS or DBMS system, facilitating traceability in the production line.

In addition, our **UBS Designer** design software makes easy the creation, editing and sending of labels to your equipment.
